Projects

Asset Tracking System

Tech Stack: Python, MySQL

- Developed a system to manage institutional assets throughout their lifecycle.
- Improved asset recording, maintenance, and utilization efficiency.
- Reduced loss, theft, duplication, and improved accountability.

Cat vs Dog Image Classification using CNN

Tech Stack: Python, TensorFlow, Keras

- Developed a CNN model to classify cat and dog images.
- Applied image normalization and data augmentation techniques.
- Implemented convolution, pooling, and dropout layers to reduce overfitting.

Sign Language Detection

Tech Stack: Python, OpenCV, Machine Learning

- Developed a gesture recognition system using computer vision.
- Converted sign language gestures into readable text and speech.
- Improved accessibility for hearing- and speech-impaired individuals.

Certifications

- Introduction To Operating System
- Introduction To Java Programming
- Cloud Computing
- Introduction To C Programming

Achievements

- Secured 2nd Place in 2nd Year Academics
- Secured 2nd Place in Mini-Project Exhibition (2025)
- Participated in Emerge State-Level Competition, JIT Davangere

Trainings

- 1-Month Hands-on Training — Seventh Sense Talent Solutions, Bengaluru
- ICT Training Workshop, Bengaluru
